Hereby I confirm that for every batch of Hydrophilic Concentrates produced, an identity check is performed at Conforma N.V on the 500 ml bottle after conditioning and labelling.

These 500ml bottles which are proved for identity are sold as such or are repacked into smaller bottles (50ml, 100ml or 250ml). This repackaging is done at Conforma N.V. according to a strict procedure, ensuring both identity and quality of the repacked bottles.
